

# Micro Laryngeal Surgery in Kolkata

## Overview

Micro laryngeal surgery is a minimally invasive procedure for conditions affecting the vocal cords and larynx. Using a laryngoscope and microscope, surgeons remove lesions without external incisions.

## Conditions Treated

- ✓ Vocal cord nodules, polyps, cysts
- ✓ Laryngeal papillomas
- ✓ Granulomas
- ✓ Early-stage vocal cord cancer
- ✓ Other voice-related disorders

## Benefits

- No external scars
- Precise surgical intervention
- Better voice outcomes
- Outpatient procedure with faster recovery
